

Don't Say Forever

© Dan Russell 2004

You say now, I say later
But that's just what we do

You say why, I say why not,
Make our dreams come true.

But every now and then a birdie whispers - Hey Listen
Look before you leap or could always wonder what you're missing

Don't say forever baby,
It scares me just a little when I think that maybe,
Our hearts could forever be entwined
Don't say forever honey
Cos right now we're young and we've got lots of money
But forever's a long long time

I went fast, You went slower
You has to take your time

Forget the past, Higher or lower
I had to make you mine

But now standing on the brink of something bigger. Go figure
We're standing on the starting line, but do we want to pull the trigger?

Don't say forever baby,
It scares me just a little when I think that maybe,
Our hearts could forever be entwined
Don't say forever honey
Cos right now we're young and we've got lots of money
But forever's a long long time

Our love is big and wide
And higher than a summer sky (but)
I get so nervous when I see forever in your eyes

Don't say forever baby,
It scares me just a little when I think that maybe,
Our hearts could forever be entwined
Don't say forever honey
Cos right now we're young and we've got lots of money
But forever's such a long long time
